EXPERIENCE

TU Bergakademie Freiberg, Germany

Apr 2026 – Present

Project Co-Lead | Research & Product Strategy

Germany

- Co-leading the development of a book integrating Data Structures, Algorithms, and Machine Learning, coordinating content planning and publication activities.
- Led and coordinated a cross-functional team of **15+ student researchers** by prioritizing tasks, tracking milestones, and ensuring timely project delivery across collaborating institutions.
- Collaborated with faculty stakeholders to align project objectives, streamline documentation workflows, and maintain publication quality through effective cross-institutional communication.

Maulana Azad National Institute of Technology (MANIT), Bhopal

Nov 2025 – Jan 2026

Research Intern

Bhopal, India

- Developed an AI-driven solution for Raga Therapy by integrating Machine Learning with IoT-based wearable systems to support intelligent healthcare applications.
- Evaluated and compared **10+ machine learning models** based on performance, scalability, and deployment feasibility to identify the most effective solution for real-world healthcare applications.

AST Consulting

May 2025 – Jun 2025

Intern

Remote

- Analyzed multiple applications to identify operational risks and recommend improvements for system reliability and user experience.
- Collaborated on implementing process improvements that enhanced system security and operational efficiency.
- Reviewed and interpreted **1000+ system logs** and performance metrics to identify patterns, resolve issues, and support data-driven decision-making.

PROJECTS

PlaceMint - AI-Powered Placement Preparation Platform

- Identified key challenges faced by students during placement preparation through user research and transformed insights into a student-centric product concept.
- Defined and prioritized core features, including AI mock interviews, resume analysis, coding practice, and personalized learning paths, based on user needs and expected impact.
- Leading product strategy by engaging with academic institutions and exploring **government funding opportunities**, strategic partnerships, and adoption initiatives to scale the platform across higher education.
- Designed user engagement features including leaderboards, streaks, and personalized progress tracking, with a projected reach of **15,000+ students**.

EDUCATION

Vellore Institute of Technology, Bhopal Campus

Sep. 2023 – 2027

Bachelor of Technology in Computer Science Engineering | CGPA: **8.63/10**

Bhopal, India

- Book Chapter:** Submitted a book chapter on *Explainable AI for IoT-Enabled Smart Healthcare*.
- Recognition:** Received official recommendation and endorsement letters from the Director of Student Welfare (DSW) for academic excellence and leadership contributions.

SKILLS

Product: Product Thinking, User Research, Feature Prioritization, Stakeholder Management, Product Documentation, Cross-functional Collaboration

Business & Analytics: MS Excel, Google Sheets, Data Analysis, SQL

Technical: Python, Java, AI Fundamentals

Tools: MS Office, Canva, ChatGPT, Claude

LEADERSHIP EXPERIENCE

Entrepreneurship Cell, VIT Bhopal (Content Lead): Led content strategy and coordinated promotional campaigns for startup events and entrepreneurship initiatives, engaging **2,000+ students**.

Google Crowdsourcing Club, VIT Bhopal (Content Lead): Managed community engagement and coordinated outreach initiatives for **500+ students**, collaborating with cross-functional student teams to execute technical events.

RoboX Club, VIT Bhopal (Technical Advisor): Mentored student teams, guided project planning and problem-solving, and supported the successful execution of technical initiatives and club activities.
